Home page : Daily check in question 📝

Today's date

📅 17

Do you have enough resources to effectively complete your work?

- Definitely
- Most of the time
- Not Sure / Maybe
- Not often
- No, I need more resources
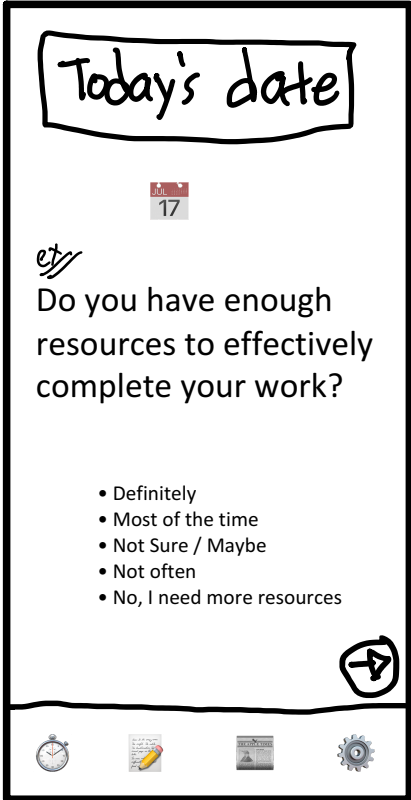

Main focus of the app is to collect live data through quick easily answered multiple choice questions. This data can be stored in a database and analyzed to provide Management with statistics about their workforce. These reports can guide Management in making informed decisions about their employees
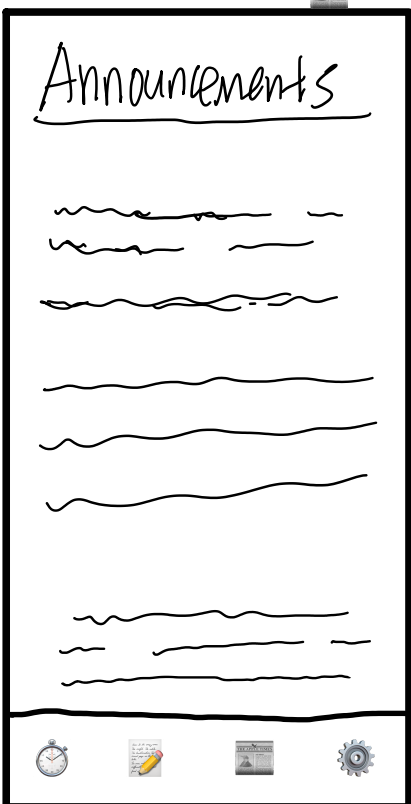

Work time page ⏱

Time

Check in time: 9:00 am

Check out time: 5:00 pm

I AM HERE
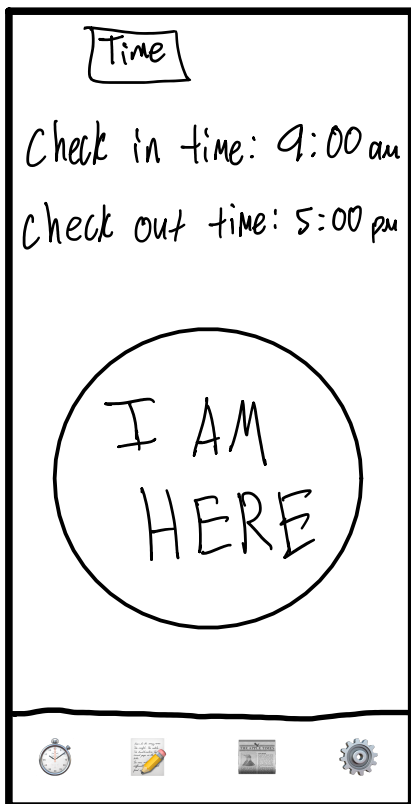

Employees can clock in and out quickly by pressing a large on screen button.
- geo location fence can verify if employee is at work / time spent at work
- automate the process of tracking hours worked
  → helps with payroll

Company News

Announcements

Employees have a live up to date feed on the latest news and announcements directly from Management or from around the company

a controlled company-wide social media page / news board
